Mr. Gary Halpern
COO
Neutronics/Biomarine Incorporated
456 Creamery Way
EXTON PA 19341 USA

Dear Mr. Halpern:

Re: Biomarine 240 R Approval

As per *Section 387(4)(f) of the Mines Regulations, 2003*, the Biomarine 240R is an approved respiratory device for mine rescue operations in the province of Saskatchewan. Notification of the receiving EN 145 certification was received on March 29, 2007. A review of this standard by the Mine Safety Unit indicated that this standard was adequate for mine rescue apparatus in Saskatchewan. An email was issued at that time approving the 240R. This letter confirms the email.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Neil Crocker'.

Neil Crocker, P. Eng.
Chief Inspector of Mines

c: Malcolm Smith – Mine Emergency Response Coordinator
